

The following search engine link can be used to explore the Smithsonian Museum of American Art virtually including artwork, artist's biographies, and information about each era of American art contained in the permanent collection. Decathletes need not search outside links about these works or artists as this site alone is rich in detail about this collection. Teams also have the option to purchase the exhibit book available from the Smithsonian Institute for \$40 that catalogues the entire permanent exhibit (however, for our purposes on the Super Quiz the teams will only need to know three portions of the exhibit so online research is recommended).

Using the Search Engine available on the Smithsonian Museum of American Art website, students can also search for biographies of the featured artists. Here is an example of what a search on Mary Cassatt yielded (link below). This information can help decathletes round their knowledge and understanding of the artists who have worked contained in these three portions of the permanent exhibit of American Art through 1940.
